**30 June 2011**

### **APPROVAL OF FINANCIAL STATEMENTS**

I am responsible for the preparation of these annual financial statements, which are set out on pages 1 to 57 in terms of Section 126 (1) of the Municipal Finance Management Act and which I have signed on behalf of the Municipality.

I certify that the salaries, allowances and benefits of Councillors as disclosed in note 25 of these financial statements are within the upper limits of the framework envisaged in Section 219 of the Constitution, read with the Remuneration of Public Officer Bearers Act and the Minister of Provincial and Local Government's determination in accordance with this Act.

I have complied with the disclosure requirements in terms of section 122 to 126 of the Municipal Finance Management Act.

**T C MAMETJA**

# **GREATER TZANEEN MUNICIPALITY**

## **ACCOUNTING POLICIES TO THE ANNUAL FINANCIAL STATEMENTS FOR THE YEAR ENDED 30 JUNE 2011**

The principal accounting policies adopted in the preparation of these financial statements are set out below and are consistent with those of the previous financial year

### **1 BASIS OF ACCOUNTING**

#### **1.1 BASIS OF PRESENTATION**

The annual financial statements have been prepared on an accrual basis of accounting and are in accordance with historical cost convention, unless specified otherwise

The Annual financial statements have been prepared in accordance with Standards of Generally Recognised Accounting Practices (GRAP) issued by the Accounting Standards Board in accordance with Section 122(3) of the Municipal Finance Management Act, (Act No 56 of 2003)

The principal accounting policies adopted in the preparation of these annual financial statements are set out below.

Assets, liabilities, revenues and expenses have not been offset except when offsetting is required or permitted by a Standard of GRAP

The accounting policies applied are consistent with those used to present the previous year's financial statements, unless explicitly stated. The details of any changes in accounting policies are explained in the relevant policy.

#### **1.2 PRESENTATION CURRENCY**

These annual financial statement are presented in South African rand, which is the functional currency of the municipality.

#### **1.3 GOING CONCERN ASSUMPTION**

The annual financial statements have been prepared on the assumption that the municipality will continue to operate as a going concern for at least the next 12 months. (Refer to note 44 for managements assessment of going concern)

#### **1.4 COMPARITIVE INFORMATION**

##### **1.4.1 Current Year Comparatives**

Budgeted amounts have been included in the annual financial statements for the current financial year only.

##### **1.4.2 Prior Year Comparatives**

When the presentation or classification of items in the annual financial statements are amended, prior period comparative amounts are reclassified.

#### **1.5 STANDARDS, AMENDMENTS TO STANDARDS AND INTERPRETATIONS ISSUED BUT NOT YET EFFECTIVE**

The following GRAP standards have been issued but not yet effective and have not been adopted early by the municipality:

GRAP 8 Interests in Joint Ventures - issued August 2006

GRAP 18 Segment Reporting - issued March 2005

GRAP 21 Impairment of non-cash generating assets

GRAP 23 Revenue from Non-Exchange Transactions (Taxes and Transfers) - issued February 2008

GRAP 24 Presentation of Budget Information in Financial Statements - issued November 2007

GRAP 26 Impairment of cash generating assets

GRAP 103 Heritage Assets - issued July 2008

### **2 PROPERTY, PLANT AND EQUIPMENT**

#### **2.1 Initial Recognition**

Property, plant and equipment are tangible non-current assets (including infrastructure assets) that are held for use in the production or supply of goods or services, rental to others, or for administrative purposes, and are expected to be used during more than one year. Items of property, plant and equipment are initially recognised as assets on acquisition date and are initially recorded at cost. The cost of an item of property, plant and equipment is the purchase price and other costs attributable to bring the asset to the location and condition necessary for it to be capable of operating in the manner intended by the municipality. Trade discounts and rebates are deducted in arriving at the cost. The cost also includes the necessary cost of dismantling and removing the asset and restoring the site on which it is located.

When significant components of an item of property, plant and equipment have different useful lives, they are accounted for as separate items (major components) of property, plant and equipment

Where an asset is acquired by the municipality for no or nominal consideration (i.e. a non-exchange transaction), the cost is deemed to be equal to the fair value of the asset on the date acquired

- 2.2** Subsequent to initial recognition, items of property, plant and equipment are measured at cost less accumulated depreciation and impairment losses. Land is not depreciated as it is deemed to have an indefinite useful life

Subsequent expenditure relating to property, plant and equipment is capitalised if it is probable that future economic benefits or potential service delivery of the asset are enhanced in excess of the originally assessed standard of performance. If expenditure only restores the originally assessed standard of performance, then it is regarded as repairs and maintenance and is expensed. The enhancement of an existing asset so that its use is expanded or the further development of an asset so that its original life is extended are examples of subsequent expenditure which should be capitalised

## **2.3 Depreciation and impairment losses**

- 2.3.1** Depreciation is calculated on cost, using the straight-line method, over the estimated useful lives of the assets. The annual depreciation rates are based on the following estimated useful lives

A more appropriate useful life can also be motivated by the department purchasing the asset, and the useful life is approved by the Financial Manager

<b>INFRASTRUCTURE</b>	<b>YEARS</b>
Roads and Paving	30
Pedestrian Malls	30
Electricity	20 - 30
Water	15 - 20
Sewerage	15 - 20
Housing	30
<b>COMMUNITY</b>	
Improvements	30
Recreational Facilities	20 - 30
Security	5
<b>OTHER</b>	
Buildings	30
Specialist Vehicles	10
Other Vehicles	5
Office Equipment	3 - 7
Furniture and fittings	7 - 10
Watercraft	15
Bins and containers	5
Specialised plant and equipment	10 - 15
Other items of plant and equipment	2 - 5

- 2.3.2** Heritage assets, which are defined as culturally significant resources, are not depreciated as they are regarded as having an indefinite life. Land is also not depreciated for the same reason

- 2.3.3** Incomplete construction work is stated at historic cost. Depreciation only commences when the asset is commissioned into use.

## **2.4 Derecognition**

Items of Property, plant and equipment are derecognised when the asset is disposed of or when there are no further economic benefits or service potential expected from the use of the asset. The gain or loss arising on the disposal or retirement of an item of property, plant and equipment is determined as the difference between the sales proceeds and the carrying value and is recognised in the Statement of Financial Performance

## **3 Intangible Assts**

An asset is identified as an intangible asset when it

- is capable of being separated or divided from an entity and sold, transferred, licensed, rented or exchanged, either individually or together with a related contract, assets or liability; or
- arises from contractual rights or other legal rights, regardless whether those rights are transferable or separate from the municipality or from other rights and obligations

An intangible asset is recognised when

- it is probable that the expected future economic benefits or service potential that are attributable to the asset will flow to the municipality; and
- the cost or fair value of the asset can be measured reliably

Intangible assets are initially recognised at cost. An intangible asset acquired at no or nominal cost, the cost shall be its fair value as at the date of acquisition. Expenditure on research (or on the research phase of an internal project) is recognised as an expense when it is incurred. An intangible asset arising from development (or from the development phase of an internal project) is recognised when:

- it is technically feasible to complete the asset so that it will be available for use or sale
- there is an intention to complete and use or sell it.
- there is an ability to use or sell it
- it will generate probable future economic benefits or service potential
- there are available technical, financial and other resources to complete the development and to use or sell the asset
- the expenditure attributable to the asset during its development can be measured reliably

Intangible assets are carried at cost less any accumulated amortisation and any accumulated impairment losses

An intangible asset is regarded as having an indefinite useful life when, based on all relevant factors, there is no foreseeable limit to the period over which the asset is expected to generate net cash inflows or service potential

Amortisation is not provided for these intangible assets, but they are tested for impairment annually and whenever there is an indication that the asset may be impaired. For all other intangible assets amortisation is provided on a straight line basis over their useful life.

The amortisation period and the amortisation method for intangible assets are reviewed at each reporting date.

Reassessing the useful life of an intangible asset with a finite useful life after it was classified as indefinite is an indicator that the asset may be impaired. As a result the asset is tested for impairment and the remaining carrying amount is amortised over its useful life

Expenditure, which enhances and extends the benefits of computer software programs beyond the original life of the software is capitalised. Computer software development costs recognised as assets are amortised using the straight line method over their useful lives. Costs associated with the maintenance of existing computer software programs are expensed as incurred.

Research and development expenditure is written off as incurred. Amortisation is provided to write down the intangible assets, on a straight line basis, to their residual values as follows:

#### **Item Useful life**

Computer software 2 - 8 years

The gain or loss is the difference between the net disposal proceeds, if any, and the carrying amount. It is recognised in surplus or deficit when the asset is derecognised.

#### **Investment property**

Investment property is property (land or a building - or part of a building - or both) held to earn rentals or for capital appreciation or both, rather than for:

- use in the production or supply of goods or services or for
- administrative purposes, or
- sale in the ordinary course of operations.

Owner-occupied property is property held for use in the production or supply of goods or services or for administrative purposes

Investment property is recognised as an asset when, it is probable that the future economic benefits or service potential that are associated with the investment property will flow to the municipality, and the cost or fair value of the investment property can be measured reliably

Investment property is initially recognised at cost. Transaction costs are included in the initial measurement.

Where investment property is acquired at no cost or for a nominal cost, its cost is its fair value as at the date of acquisition

Costs include costs incurred initially and costs incurred subsequently to add to, or to replace a part of, or service a property. If a replacement part is recognised in the carrying amount of the investment property, the carrying amount of the replaced part is derecognised.

#### **Cost model**

Investment property is carried at cost less accumulated depreciation and any accumulated impairment losses

Depreciation is provided to write down the cost, less estimated residual value other method - describe over the useful life of the property, which is as follows

#### **Item Useful life**

Property - Land indefinite

Property - Buildings 30 years

Investment property is derecognised on disposal or when the investment property is permanently withdrawn from use and no future economic benefits or service potential are expected from its disposal

Gains or losses arising from the retirement or disposal of investment property is the difference between the net disposal proceeds and the carrying amount of the asset and is recognised in surplus or deficit in the period of retirement or disposal

Compensation from third parties for investment property that was impaired, lost or given up is recognised in surplus or deficit when the compensation becomes receivable

## **4 FINANCIAL INSTRUMENTS**

### **4.1 Initial Recognition**

Financial Instruments are initially recognised at fair value.

### **4.2 Subsequent Measurement**

Financial Assets are categorised according to their nature as either financial assets at fair value through profit or loss, held-to-maturity, loans and receivables, or available for sale. Financial liabilities are categorised as either at fair value through profit or loss or financial liabilities carried at amortised cost ("other"). The subsequent measurement of financial assets and liabilities depends on this categorisation and, in the absence of an approved GRAP Standard on Financial Instruments, is in accordance with IAS 39

#### **4.2.1 Investments**

Investments, which may include listed government bonds, unlisted municipal bonds, fixed deposits and short-term deposits invested in registered commercial banks, are categorised as either held-to-maturity where the criteria for that categorisation are met, or as loans and receivables, and are measured at amortised cost. Where investments have been impaired, the carrying value is adjusted by the impairment loss, which is recognised as an expense in the period that the impairment is identified. Impairments are calculated as being the difference between the carrying amount and the present value of the expected future cash flows flowing from the Instrument.

#### **4.2.2 Trade and other Receivables**

Trade and other receivables are categorised as financial assets: Loans and receivables are initially recognised at fair value and subsequently carried at amortised cost. Amortised cost refers to the initial carrying amount, plus interest, less repayments and impairments. An estimate is made for doubtful receivables based on all outstanding amounts of 120 days and longer at year-end. Significant financial difficulties of the debtor, probability that the debtor will enter bankruptcy or financial reorganisation, and default or delinquency in payments (more than 30 days overdue) are considered indicators that the trade receivable is impaired. Impairments are determined by discounting expected future cash flows to their present value. Amounts that are receivable within 12 months from the reporting date are classified as current. The carrying amount of trade and other receivables is a reasonable approximation of fair value.

An impairment of receivables is accounted for by reducing the carrying amount of trade receivables through the use of an allowance account, and the amount of the loss is recognised in the Statement of Financial Performance within operating expenses. When a receivable is uncollectible, it is written off. Subsequent recoveries of amounts previously written off are credited recognised under other income.

#### **4.2.3 Trade Payables and Borrowings**

Financial liabilities consist of trade payables and borrowings. They are categorised as financial liabilities held at amortised cost, are initially recognised at fair value and subsequently measured at amortised cost which is the initial carrying amount, less repayments, plus interest.

### **4 FINANCIAL INSTRUMENT**

#### **4.2 Subsequent Measurement**

##### **4.2.4 Cash and Cash Equivalents**

Cash includes cash on hand (including petty cash) and cash with banks (including call deposits). Cash equivalents are short-term highly liquid investments, readily convertible into known amounts of cash, that are held with registered banking institutions with maturities of three months or less and are subject to an insignificant risk of change in value. For the purposes of the cash flow statement, cash and cash equivalents comprise cash on hand, deposits held on call with banks, net of bank overdrafts. The municipality categorises cash and cash equivalents as financial assets. Loans and receivables.

Bank overdrafts are recorded based on the facility utilised. Finance charges on bank overdraft are expensed as incurred. Amounts owing in respect of bank overdrafts are categorised as financial liabilities. Other financial liabilities carried at amortised cost.

### **5 UNAUTHORISED EXPENDITURE**

Unauthorised expenditure is expenditure that has not been budgeted, expenditure that is not in terms of the conditions of an allocation received from another sphere of government, municipality or organ of state and expenditure in the form of a grant that is not permitted in terms of the Municipal Finance Management Act (Act No. 56 of 2003). Unauthorised expenditure is accounted for as an expense in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### **6 IRREGULAR EXPENDITURE**

Irregular expenditure is expenditure that is contrary to the Municipal Finance Management Act (Act No. 56 of 2003), the Municipal Systems Act (Act No. 32 of 2000), the Public Office Bearers Act (Act No. 20 of 1998) or is in contravention of the Municipality's supply chain management policy. Irregular expenditure excludes unauthorised expenditure. Irregular expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### **7 FRUITLESS AND WASTEFUL EXPENDITURE**

Fruitless and wasteful expenditure is expenditure that was made in vain and would have been avoided had reasonable care been exercised. Fruitless and wasteful expenditure is accounted for as expenditure in the Statement of Financial Performance and where recovered, it is subsequently accounted for as revenue in the Statement of Financial Performance.

### **8 PROVISIONS**

Provisions are recognised when the municipality has a present or constructive obligation as a result of past events, it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation and a reliable estimate of the provision can be made. Provisions are reviewed at each balance sheet date and adjusted to reflect the current best estimate.

### **9 LEASES**

Leases are classified as finance leases where substantially all the risks and rewards associated with ownership of an asset are transferred to the Municipality. Property, plant and equipment or intangible assets subject to finance lease agreements are initially recognised at the lower of the asset's fair value and the present value of the minimum lease payments. The corresponding liabilities are initially recognised at the inception of the lease and are measured as the sum of the minimum lease payments due in terms of the lease agreement, discounted for the effect of interest. In discounting the lease payments, the municipality uses the interest rate that exactly discounts the lease payments and unguaranteed residual value to the fair value of the asset plus any direct costs incurred.

Subsequent to initial recognition, the leased assets are accounted for in accordance with the stated accounting policies applicable to property, plant and equipment or intangibles. The lease liability is reduced by the lease payments, which are allocated between the lease finance cost and the capital repayments using effective interest rate method. Lease finance costs are expensed when incurred. The accounting policies relating to derecognition of financial instruments are applied to lease payables. The lease asset is depreciated over the shorter of the asset's useful life or the lease term.

Operating leases are those leases that do not fall within the scope of the above definition. Operating lease rentals are accrued on a straight-line basis over the term of the relevant lease.

Property, plant and equipment subject to finance lease agreements are capitalised at their cash equivalent and the corresponding liabilities are raised. The cost of the item of property, plant and equipment is depreciated at appropriate rates on the straight-line basis over its estimated useful life.

## **10 REVENUE RECOGNITION**

### **10.1 Revenue from exchange transactions**

Revenue from exchange transactions refers to revenue that accrued to the municipality directly in return for services rendered / goods sold, the value of which approximates the consideration received or receivable.

10.1.1 Revenue arising from the application of the approved tariff of changes is recognised when the relevant service is rendered by applying the relevant authorised tariff. This includes the issuing of licenses and permits.

10.1.2 Service charges relating to Electricity and Water are based on consumption. Meters are read on a monthly basis and revenue is recognized when invoiced. Provisional estimates of consumption are made monthly when meter readings have not been performed and are based on the consumption history. The provisional estimates of consumption are recognized as revenue when invoiced. Adjustments to provisional estimates of consumption are made in the invoicing period when meters have been read. These adjustments are recognized as revenue in the invoicing period.

10.1.3 Service charges relating to solid waste, sanitation and sewerage are levied monthly in terms of the approved tariffs.

10.1.4 Interest earned on investments is recognised in the Statement of Financial Performance on a time proportionate basis that takes into account the effective yield on the investment.

10.1.5 Dividends are recognized when the Municipality's right to receive payment is established.

10.1.6 Revenue from the sale of goods is recognized when all the following conditions have been satisfied:

- The Municipality has transferred to the buyer the significant risks and rewards of ownership of the goods.
- The Municipality retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold.
- The amount of revenue can be measured reliably.
- It is probable that the economic benefits or service potential associated with the transaction will flow to the Municipality.

### **10.2 Revenue from non-exchange transactions**

Revenue from non-exchange transactions refers to transactions where the municipality received revenue from another entity without directly giving approximately equal value in exchange. Revenue from non-exchange transactions is generally recognised to the extent that the related receipt or receivable qualifies for recognition as an asset and there is no liability to repay the amount.

10.2.1 Revenue from rates is recognized when the legal entitlement to this revenue arises. Collection charges are recognized when such amounts are legally enforceable. Interest on unpaid rates is recognized on a time proportion basis with reference to the principal amount receivable and effective interest rate applicable.

The same rate is charged to all categories. Rebates are granted to certain categories of ratepayers and are deducted from revenue.

10.2.2 Fines constitute both spot fines and summonses. Revenue from spot fines is recognised when payment is received, together with an estimate of spot fines and summonses that will be received based on past experience of amounts collected.

10.2.3 Revenue from public contributions and donations is recognised when all conditions associated with the contribution have been met or where the contribution is to finance property, plant and equipment, when such items of property, plant and equipment qualifies for recognition and first becomes available for use by the municipality. Where public contributions have been received but the municipality has not met the related conditions, a deferred income (liability) is recognised.

10.2.4 Contributed property, plant and equipment is recognised when such items of property, plant and equipment qualifies for recognition and become available for use by the municipality

10.2.5 Revenue from the recovery of unauthorised, irregular, fruitless and wasteful expenditure is based on legislated procedures, including those set out in the Municipal Finance Management Act (Act No. 56 of 2003) and is recognised when the recovery thereof from the responsible councillors or officials is virtually certain

## **11 INVENTORIES**

Inventories consist of raw materials, work in progress, consumables and finished goods, which are valued at the lower of cost, determined on the first in, first out method, and net realisable value. Where it is held for distribution or consumption at no charge or for a nominal amount, inventories are valued at the lower of cost and current replacement value.

Cost of inventories comprises all costs of purchase, cost of conversion and other costs incurred in bringing the inventories to their present location and condition. Redundant and slow moving inventories are identified and written down with regard to their cost. Consumables are written down according to their age, condition and utility.

Stands available for sale during the next 12 months are recognised as inventory.

## **12 CONDITIONAL GRANTS AND RECEIPTS**

Revenue received from conditional grants, donations and funding are recognised as revenue to the extent that the Municipality has complied with all of the criteria, conditions or obligations embodied in the agreement. To the extent that the criteria, conditions or obligations have not been met a liability is recognised. The liability is transferred to revenue as and when the conditions attached to the grants are met. Grants without any conditions attached are recognised as revenue when the asset is recognised.

## **13 SEGMENTAL INFORMATION**

Segmental information on Property, Plant and Equipment as well as income and expenditure is set out in Appendix C and D based on the budget formats prescribed by National Treasury. The municipality operates solely in its area of jurisdiction as determined by the Demarcation Board.

## **14 VALUE ADDED TAX**

The Municipality accounts for Value Added Tax on the payment basis.

## **15 EMPLOYEES BENEFITS**

### **15.1 Retirement Funds**

The Municipality provides retirement benefits for its Employees and Councillors. The contribution to fund obligations for the payment of retirement benefits are charged against income in the year they become payable.

### **15.2 Medical Aid: Continued Members**

The Municipality provides post retirement benefits by subsidising the medical aid contribution of certain retired staff. According to the rules of the medical aid funds, with which the Municipality is associated, a member (who is on the current conditions of service), on retirement, is entitled to remain a continued member of such medical aid fund, in which case the member is liable for 30% of the medical aid membership fee, and the Municipality for the remaining 70%.

These contributions are charged to the operating account when paid.

### **15.3 Accrued Leave Pay**

Liabilities for annual leave are recognised as they accrue to employees. Accrual is based on the total accrued leave days at year-end.

## 16. CONTINGENCIES

Contingent assets and contingent liabilities are not recognised. Contingencies are disclosed in Note 42.

## 17 IMPAIRMENT OF ASSETS

The municipality assesses at each reporting date whether there is any indication that an asset may be impaired. If any such indication exists, the municipality estimates the recoverable service amount of the asset.

Irrespective of whether there is any indication of impairment, the municipality also

- test intangible assets with an indefinite useful life or intangible assets not yet available for use for impairment annually by comparing its carrying amount with its recoverable amount. This impairment test is performed during the annual period and at the same time every period.

If there is any indication that an asset may be impaired, the recoverable service amount is estimated for the individual asset. If it is not possible to estimate the recoverable service amount of the individual asset, the recoverable service amount of the cash-generating unit to which the asset belongs is determined.

The recoverable service amount of an asset or a cash-generating unit is the higher of its fair value less costs to sell and its value in use.

If the recoverable service amount of an asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. That reduction is an impairment loss.

An impairment loss of assets carried at cost less any accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any impairment loss of a revalued asset is treated as a revaluation decrease.

An impairment loss is recognised for cash-generating units if the recoverable service amount of the unit is less than the carrying amount of the unit. The impairment loss is allocated to reduce the carrying amount of the assets of the unit as follows:

- to the assets of the unit, pro rata on the basis of the carrying amount of each asset in the unit.D274

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for assets may no longer exist or may have decreased. If any such indication exists, the recoverable service amounts of those assets are estimated.

The increased carrying amount of an asset attributable to a reversal of an impairment loss does not exceed the carrying amount that would have been determined had no impairment loss been recognised for the asset in prior periods.

A reversal of an impairment loss of assets carried at cost less accumulated depreciation or amortisation is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalue asset is treated as a revaluation increase.

# GREATER TZANEEN MUNICIPALITY

## New standards and interpretations

### Standards and interpretations issued, but not yet effective

The municipality has not applied the following standards and interpretations, which have been published and are mandatory for the municipality's accounting periods beginning on or after 01 July 2010 or later periods:

#### GRAP 18: Segment Reporting

Segments are identified by the way in which information is reported to management, both for purposes of assessing performance and making decisions about how future resources will be allocated to the various activities undertaken by the municipality. The major classifications of activities identified in budget documentation will usually reflect the segments for which an entity reports information to management.

Segment information is either presented based on service or geographical segments. Service segments relate to a distinguishable component of an entity that provides specific outputs or achieves particular operating objectives that are in line with the municipality's overall mission. Geographical segments relate to specific outputs generated, or particular objectives achieved, by an entity within a particular region.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

Directive 2 - Transitional provisions for public entities, municipal entities and constitutional institutions, states that no comparative segment information need to be presented on initial adoption of this Standard.

Directive 3 - Transitional provisions for high capacity municipalities states that no comparative segment information need to be presented on initial adoption of the Standard. Where items have not been recognised as a result of transitional provisions under the Standard of GRAP on Property, Plant and Equipment, recognition requirements of this Standard would not apply to such items until the transitional provision in that Standard expires.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### GRAP 23: Revenue from Non-exchange Transactions

Revenue from non-exchange transactions arises when an entity receives value from another entity without directly giving approximately equal value in exchange. An asset acquired through a non-exchange transaction shall initially be measured at its fair value as at the date of acquisition.

This revenue will be measured at the amount of increase in net assets recognised by the municipality.

An inflow of resources from a non-exchange transaction recognised as an asset shall be recognised as revenue, except to the extent that a liability is recognised for the same inflow. As an entity satisfies a present obligation recognised as a liability in respect of an inflow of resources from a non-exchange transaction recognised as an asset, it will reduce the carrying amount of the liability recognised as recognise an amount equal to that reduction.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The standard is approved but not yet effective

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### **GRAP 24: Presentation of Budget Information in the Financial Statements**

Subject to the requirements of paragraph .19, an entity shall present a comparison of the budget amounts for which it is held publicly accountable and actual amounts either as a separate additional financial statement or as additional budget columns in the financial statements currently presented in accordance with Standards of GRAP. The comparison of budget and actual amounts shall present separately for each level of legislative oversight:

- the approved and final budget amounts;

- the actual amounts on a comparable basis; and

- by way of note disclosure, an explanation of material differences between the budget for which the municipality is held publicly accountable and actual amounts, unless such explanation is included in other public documents issued in conjunction with the financial statements, and a cross reference to those documents is made in the notes.

Where an entity prepares its budget and annual financial statements on a comparable basis, it includes the comparison as an additional column in the primary annual financial statements. Where the budget and annual financial statements are not prepared on a comparable basis, a separate statement is prepared called the 'Statement of Comparison of Budget and Actual Amounts'. This statement compares the budget amounts with the amounts in the annual financial statements adjusted to be comparable to the budget.

A comparable basis means that the budget and annual financial statements:

- are prepared using the same basis of accounting i.e. either cash or accrual;

- include the same activities and entities;

- use the same classification system; and

- are prepared for the same period.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The standard is approved but not yet effective

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### **GRAP 103: Heritage Assets**

Grp 103 defines heritage assets as assets which have a cultural, environmental, historical, natural, scientific, technological or artistic significance and are held indefinitely for the benefit of present and future generations.

Certain heritage assets are described as inalienable items thus assets which are retained indefinitely and cannot be disposed of without consent as required by law or otherwise.

A heritage asset should be recognised as an asset only if:

- it is probable that future economic benefits or service potential associated with the asset will to the municipality; and

- the cost of fair value of the asset can be measured reliably.

The standard required judgment in applying the initial recognition criteria to the specific circumstances surrounding the entity and the assets.

Grp 103 states that a heritage asset should be measured at its cost unless it is acquired through a non-exchange transaction which

should then be measured at its fair value as at the date of acquisition.

In terms of the standard, an entity has a choice between the cost and revaluation model as accounting policy for subsequent recognition and should apply the chosen policy to an entire class of heritage assets.

The cost model requires a class of heritage assets to be carried at its cost less any accumulated impairment losses.

The revaluation model required a class of heritage assets to be carried at its fair value at the date of the revaluation less any subsequent impairment losses. The standard also states that a restriction on the disposal of a heritage asset does not preclude the entity from determining the fair value.

Grap 103 prescribes that when determining the fair value of a heritage asset that has more than one purpose, the fair value should reflect both the asset's heritage value and the value obtained from its use in the production or supply of goods or services or for administrative purposes.

If a heritage asset's carrying amount is increased as a result of a revaluation, the increase should be credited directly to a revaluation surplus. However, the increase should be recognised in surplus or deficit to the extent that it reverses a revaluation decrease of the same heritage asset previously recognised in surplus or deficit. If a heritage asset's carrying amount is decreased as a result of a revaluation, the decrease should be recognised in surplus or deficit. However, the decrease should be debited directly to a revaluation surplus to the extent of any credit balance existing in the revaluation surplus in respect of that heritage asset.

Grap 103 states that a heritage asset should not be depreciated but an entity should assess at each reporting date whether there is an indication that it may be impaired.

In terms of the standard, compensation from third parties for heritage assets that have been impaired, lost or given up, should be included in surplus or deficit when the compensation becomes receivable.

For a transfer from heritage assets carried at a revalued amount to property, plant and equipment, investment property, inventories or intangible assets, the asset's deemed cost for subsequent accounting should be its revalued amount at the date of transfer. The entity should treat any difference at that date between the carrying amount of the heritage asset and its fair value in the same way as a revaluation in accordance with this Standard. If an item of property, plant and equipment or an intangible asset carried at a revalued amount, or investment property carried at fair value is reclassified as a heritage asset carried at a revalued amount, the entity applies the applicable Standard of GRAP to that asset up to the date of change. The entity treats any difference at that date between the carrying amount of the asset and its fair value in accordance with the applicable Standard of GRAP relating to that asset. For a transfer from investment property carried at fair value, or inventories to heritage assets at a revalued amount, any difference between the fair value of the asset at that date and its previous carrying amount should be recognised in surplus or deficit.

The carrying amount of a heritage asset should be derecognised:

- on disposal, or
- when no future economic benefits or service potential are expected from its use or disposal.

The gain or loss arising from the derecognition of a heritage asset should be determined as the difference between the net disposal proceeds, if any, and the carrying amount of the heritage asset. Such difference is recognised in surplus or deficit when the heritage asset is derecognised.

The standard is approved but not yet effective

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

## **GRAP 21: Impairment of non-cash-generating assets**

Non-cash-generating assets are assets other than cash-generating assets.

When the carrying amount of a non-cash-generating asset exceeds its recoverable service amount, it is impaired.

A municipality assesses at each reporting date whether there is any indication that a non-cash-generating asset may be impaired. If any such indication exists, an entity estimates the recoverable service amount of the asset.

The present value of the remaining service potential of a non-cash-generating asset is determined using one of the following approaches:

- Depreciated replacement cost approach
- Restoration cost approach
- Service units approach

If the recoverable service amount of a non-cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable service amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued non-cash-generating asset is treated as a revaluation decrease.

A municipality assess at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a non cash-generating asset may no longer exist or may have decreased. If any such indication exists, an entity estimates the recoverable service amount of that asset.

A reversal of an impairment loss for a non-cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued non-cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The standard is approved but not yet effective

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

## **GRAP 26: Impairment of cash-generating assets**

Cash-generating assets are those assets held by a municipality with the primary objective of generating a commercial return. When an asset is deployed in a manner consistent with that adopted by a profit-orientated entity, it generates a commercial return.

When the carrying amount of a cash-generating asset exceeds its recoverable amount, it is impaired.

An entity assesses at each reporting date whether there is any indication that a cash-generating asset may be impaired. If any such indication exists, a municipality estimates the recoverable amount of the asset. When estimating the value in use of an asset, a municipality estimates the future cash inflows and outflows to be derived from continuing use of the asset and from its ultimate disposal and a municipality applies the appropriate discount rate to those future cash flows.

If the recoverable amount of a cash-generating asset is less than its carrying amount, the carrying amount of the asset is reduced to its recoverable amount. This reduction is an impairment loss. An impairment loss is recognised immediately in surplus or deficit. Any impairment loss of a revalued cash-generating asset is treated as a revaluation decrease.

If there is any indication that an asset may be impaired, the recoverable amount is estimated for the individual asset. If it is not possible to estimate the recoverable amount of the individual asset, a municipality determines the recoverable amount of the cash-generating unit to which the asset belongs (the asset's cash-generating unit).

If an active market exists for the output produced by an asset or group of assets, that asset or group of assets is identified as a cash-generating unit, even if some or all of the output is used internally. If the cash inflows generated by any asset or cash-generating unit are affected by internal transfer pricing, an entity use management's best estimate of future price(s) that could be achieved in arm's length transactions in estimating:

- the future cash inflows used to determine the asset's or cash-generating unit's value in use; and

the future cash outflows used to determine the value in use of any other assets or cash-generating units that are affected by the internal transfer pricing.

Cash-generating units are identified consistently from period to period for the same asset or types of assets, unless a change is justified.

An impairment loss is recognised for a cash-generating unit if the recoverable amount of the unit is less than the carrying amount of the unit. The impairment is allocated to reduce the carrying amount of the cash-generating assets of the unit on a pro rata basis, based on the carrying amount of each asset in the unit. These reductions in carrying amounts are treated as impairment losses on individual assets.

Where a non-cash-generating asset contributes to a cash-generating unit, a proportion of the carrying amount of that non-cash-generating asset is allocated to the carrying amount of the cash-generating unit prior to estimation of the recoverable amount of the cash-generating unit.

A municipality assesses at each reporting date whether there is any indication that an impairment loss recognised in prior periods for a cash-generating asset may no longer exist or may have decreased. If any such indication exists, a municipality estimates the recoverable amount of that asset.

A reversal of an impairment loss for a cash-generating asset is recognised immediately in surplus or deficit. Any reversal of an impairment loss of a revalued cash-generating asset is treated as a revaluation increase.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The standard is approved but not yet effective

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### **GRAP 25: Employee benefits**

The objective of GRAP25 is to prescribe the accounting and disclosure for employee benefits. The Standard requires a municipality to recognise:

- a liability when an employee has provided service in exchange for employee benefits to be paid in the future; and
- an expense when a municipality consumes the economic benefits or service potential arising from service provided by an employee in exchange for employee benefits.

GRAP25 must be applied by an employer in accounting for all employee benefits, except share based payment transactions.

GRAP25 defines, amongst others, the following:

- Employee benefits as all forms of consideration given by a municipality in exchange for service rendered by employees;
- Defined contribution plans as post-employment benefit plans under which a municipality pays fixed contributions into a separate entity (a fund) and will have no legal or constructive obligation to pay further contributions if the fund does not hold sufficient assets to pay all employee benefits relating to employee service in the current and prior periods;
- Defined benefit plans as post-employment benefit plans other than defined contribution plans;
- Multi-employer plans as defined contribution plans (other than state plans and composite social security programmes) or defined benefit plans (other than state plans) that:
  - pool the assets contributed by various entities that are not under common control; and
  - use those assets to provide benefits to employees of more than one entity, on the basis that contribution and benefit levels are determined without regard to the identity of the municipality that employs the employees concerned;
- Other long-term employee benefits as employee benefits (other than post-employment benefits and termination benefits) that is not due to be settled within twelve months after the end of the period in which the employees render the related service;
- Post-employment benefits as employee benefits (other than termination benefits) which are payable after the completion of employment;
- Post-employment benefit plans as formal or informal arrangements under which a municipality provides post-employment

benefits for one or more employees;

Short-term employee benefits as employee benefits (other than termination benefits) that are due to be settled within twelve months after the end of the period in which the employees render the related service;

State plans as plans other than composite social security programmes established by legislation which operate as if they are multi-employer plans for all entities in economic categories laid down in legislation;

Termination benefits as employee benefits payable as a result of either:

- an entity's decision to terminate an employee's employment before the normal retirement date; or
- an employee's decision to accept voluntary redundancy in exchange for those benefits;

Vested employee benefits as employee benefits that are not conditional on future employment.

The standard states the recognition, measurement and disclosure requirements of:

Short-term employee benefits:

- All short-term employee benefits;
- Short-term compensated absences;
- Bonus, incentive and performance related payments;

Post-employment benefits: Defined contribution plans;

Other long-term employee benefits;

Termination benefits.

The standard states Post-employment benefits: Distinction between defined contribution plans and defined benefit plans:

Multi-employer plans;

Defined benefit plans where the participating entities are under common control;

State plans;

Composite social security programmes;

Insured benefits.

The standard states, for Post-employment benefits: Defined benefit plans, the following requirements:

Recognition and measurement;

Presentation;

Disclosure;

Accounting for the constructive obligation;

Statement of financial position;

Asset recognition ceiling;

Asset recognition ceiling: When a minimum funding requirement may give rise to a liability;

Statement of financial performance.

The standard prescribes recognition and measurement for:

Present value of defined benefit obligations and current service cost:

- Actuarial valuation method;
- Attributing benefits to periods of service;
- Actuarial assumptions;
- Actuarial assumptions: Discount rate;
- Actuarial assumptions: Salaries, benefits and medical costs;
- Actuarial gains and losses;
- Past service cost.

Plan assets:

- Fair value of plan assets;
- Reimbursements;
- Return on plan assets.

The standard also deals with Entity combinations and Curtailments and settlements.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations. It is unlikely that the standard will have a material impact on the municipality's annual financial statements.

#### **GRAP 104: Financial Instruments**

The standard prescribes recognition, measurement, presentation and disclosure requirements for financial instruments. Financial instruments are defined as those contracts that results in a financial asset in one municipality and a financial liability or residual interest in another municipality. A key distinguishing factor between financial assets and financial liabilities and other assets and liabilities, is that they are settled in cash or by exchanging financial instruments rather than through the provision of goods or services.

One of the key considerations in initially recognising financial instruments is the distinction, by the issuers of those instruments, between financial assets, financial liabilities and residual interests. Financial assets and financial liabilities are distinguished from residual interests because they involve a contractual right or obligation to receive or pay cash or another financial instrument. Residual interests entitle a municipality to a portion of another municipality's net assets in the event of liquidation and, to dividends or similar distributions paid at management's discretion.

In determining whether a financial instrument is a financial asset, financial liability or a residual interest, a municipality considers the substance of the contract and not just the legal form.

Where a single instrument contains both a liability and a residual interest component, the issuer allocates the instrument into its component parts. The issuer recognises the liability component at its fair value and recognises the residual interest as the difference between the carrying amount of the instrument and the fair value of the liability component. No gain or loss is recognised by separating the instrument into its component parts.

Financial assets and financial liabilities are initially recognised at fair value. Where a municipality subsequently measures financial assets and financial liabilities at amortised cost or cost, transactions costs are included in the cost of the asset or liability.

The transaction price usually equals the fair value at initial recognition, except in certain circumstances, for example, where interest free credit is granted or where credit is granted at a below market rate of interest.

Concessionary loans are loans either received by or granted to another municipality on concessionary terms, e.g. at low interest rates and flexible repayment terms. On initial recognition, the fair value of a concessionary loan is the present value of the agreed contractual cash flows, discounted using a market related rate of interest for a similar transaction. The difference between the proceeds either received or paid and the present value of the contractual cash flows is accounted for as non-exchange revenue by the recipient of a concessionary loan in accordance with Standard of GRAP on Revenue from Non-exchange Revenue Transactions (Taxes and Transfers), and using the Framework for the Preparation and Presentation of Financial Statements (usually as an expense) by the grantor of the loan.

Financial assets and financial liabilities are subsequently measured either at fair value or, amortised cost or cost. A municipality measures a financial instrument at fair value if it is:

- a derivative;
- a combined instrument designated at fair value, i.e. an instrument that includes a derivative and a non-derivative host contract; held-for-trading;
- a non-derivative instrument with fixed or determinable payments that is designated at initial recognition to be measured at fair value;
- an investment in a residual interest for which fair value can be measured reliably; and
- other instruments that do not meet the definition of financial instruments at amortised cost or cost.

Derivatives are measured at fair value. Combined instruments that include a derivative and non-derivative host contract are accounted for as follows:

Where an embedded derivative is included in a host contract which is a financial instrument within the scope of this Standard, an entity can designate the entire contract to be measured at fair value or, it can account for the host contract and embedded derivative separately using GRAP 104. A municipality is however required to measure the entire instrument at fair value if the fair value of the derivative cannot be measured reliably.

Where the host contract is not a financial instrument within the scope of this Standard, the host contract and embedded derivative are accounted for separately using GRAP 104 and the relevant Standard of GRAP.

Financial assets and financial liabilities that are non-derivative instruments with fixed or determinable payments, for example deposits with banks, receivables and payables, are measured at amortised cost. At initial recognition, a municipality can however designate such an instrument to be measured at fair value.

A municipality can only measure investments in residual interests at cost where the fair value of the interest cannot be determined reliably.

Once a municipality has classified a financial asset or a financial liability either at fair value or amortised cost or cost, it is only allowed to reclassify such instruments in limited instances.

An entity derecognises a financial asset, or the specifically identified cash flows of an asset, when:

- the cash flows from the asset expire, are settled or waived;

- significant risks and rewards are transferred to another party; or

- despite having retained significant risks and rewards, a municipality has transferred control of the asset to another municipality.

A municipality derecognises a financial liability when the obligation is extinguished. Exchanges of debt instruments between a borrower and a lender are treated as the extinguishment of an existing liability and the recognition of a new financial liability. Where a municipality modifies the term of an existing financial liability, it is also treated as the extinguishment of an existing liability and the recognition of a new liability.

A municipality cannot offset financial assets and financial liabilities in the statement of financial position unless a legal right of set-off exists, and the parties intend to settle on a net basis.

GRAP 104 requires extensive disclosures on the significance of financial instruments for a municipality's statement of financial position and statement of financial performance, as well as the nature and extent of the risks that a municipality is exposed to as a result of its annual financial statements. Some disclosures, for example the disclosure of fair values for instruments measured at amortised cost or cost and the preparation of a sensitivity analysis, are encouraged rather than required.

GRAP 104 does not prescribe principles for hedge accounting. A municipality is permitted to apply hedge accounting, as long as the principles in IAS 39 are applied.

This Standard has been approved by the Board but its effective date has not yet been determined by the Minister of Finance. The effective date indicated is a provisional date and could change depending on the decision of the Minister of Finance.

The effective date of the standard is for years beginning on or after 01 April 2011.

The municipality does not envisage the adoption of the standard until such time as it becomes applicable to the municipality's operations.

It is unlikely that the amendment will have a material impact on the municipality's annual financial statements.

## 4 NON-CURRENT PROVISIONS

<b>Non-current provision</b>	<u>45 229 289</u>	<u>33 023 445</u>
Provision for rehabilitation of landfill site	<u>2 374 136</u>	<u>2 158 305</u>
Balance at beginning of the year	2 158 305	1 962 096
Contributions to provision	215 831	196 209
<b>Balance at end of the year</b>	<u>2 374 136</u>	<u>2 158 305</u>

The provision for rehabilitation of landfill sites relates to the legal obligation to rehabilitate landfill sites used for waste disposal. It is calculated as the present value of the future obligation, discounted at 10% over an average period of 20 years. The due date of this provision is June 2027.

Provision for long service awards	<b>4 720 463</b>	<b>4 299 221</b>
Current -service cost	647 144	548 082
Interest cost	349 855	323 376
Actuarial (gain)/loss recognised in P&L	234 627	243 590
Net periodic cost recognised in P&L	<b>1 231 626</b>	<b>1 115 048</b>
Expected employer benefit vestings	-810 384	-719 794
Transitional liability recognised outside P&L	4 299 221	3 903 967
<b>Closing Balance</b>	<b>4 720 463</b>	<b>4 299 221</b>

Long service awards relates to the legal obligation to provide for long service leave awards. An actuarial valuation has been performed on all 661 employees that are entitled to long service leave awards on 30 June 2011. The long service leave awards liability is not a funded arrangement, i.e. no separate assets have been set aside to meet this liability.

Provision for post - employment health care benefits	<b>38 134 690</b>	<b>26 565 919</b>
Current -service cost	1 693 663	1 618 573
Interest cost	2 411 292	2 249 829
Actuarial (gain)/loss recognised in P&L	8 310 134	-1 718 930
Net periodic cost recognised in P&L	<b>12 415 089</b>	<b>2 149 472</b>
Expected employer benefit payments	-846 318	-767 480

<b>Closing Balance</b>	<b>38 134 690</b>	<b>26 565 919</b>

The post-employment health care benefits valuation considers all employees, retired employees and their dependants who participate in the health care arrangements and are entitled to a post-employment medical scheme subsidy. The post-employment health care liability is not a funded arrangement, i.e. no separate assets have been set aside to meet this liability. The effective date of the valuation is 30 June 2011.

Summary of the eligible in -service membership (Post-employment health care benefits)

	Female	Male	Total
Number of principal members	115	143	258
Number of Eligible Non-Members	125	283	408
Average age	39.5	45.4	43.2
Average past service	6.2	11.4	9.5
Average no. of dependants	1.7	1.9	1.8

Summary of continuation membership (Post-employment health care benefit)

	Female	male	Total
Number of principal members	17	23.0	40.0
Average age of members	68.9	69.4	69.2
Average no. of dependants	0.2	0.8	0.5
Average employer contribution	R 2 041	R 2 954	R 2 566

In-service members will receive a post-employment subsidy of 60% of the contribution payable. Continuation members receive either a 60% subsidy or a 70% subsidy. Upon a member's death-in-service or death-in-retirement, the surviving dependants will continue to receive the same percentage subsidy.

Summary of the key financial assumptions (Post-employment health care benefit)

Assumption	Value p a
Discount rate	8.67%
Health care cost inflation rate	7.32%
Net effective discount rate	1.26%

	2011	2010
5 CURRENT PROVISIONS	R	R
Performance bonus	1 982 059	1 845 782
	<u>1 982 059</u>	<u>1 845 782</u>

Performance bonuses accrue to Section 57 Managers and HOD's on annual basis subject to certain conditions. The provision is an estimate of the amount due at the reporting date to staff.

Performance bonuses are paid one year in arrears as the assessment of eligible employees had not taken place at the end of the reporting period.

Performance bonuses are measured at face value as it is expected that these would be paid shortly after the financial year end once performance evaluations have been completed.

	<u>Performance Bonus</u>	<u>Performance Bonus</u>
Balance at beginning of year	1 845 782	1 547 258
Performance bonuses paid	-39 062	-42 632
Contributions to provision	175 339	341 158
Balance at the end of year	<u>1 982 059</u>	<u>1 845 782</u>

#### 6 ACCOUNTS PAYABLE

Trade creditors	53 849 097	70 474 666
Payments received in advance	4 850 007	3 498 329
13th Cheque	3 022 981	3 225 779
Staff leave	4 864 488	4 399 414
Retention	8 922 094	6 187 509
Unknown direct deposits	3 228 586	2 327 165
Other creditors	570 546	138 900
Total Creditors	<u>79 307 759</u>	<u>90 251 762</u>

The Municipality did not default on any of the accounts payable in respect of capital or interest portions.

No terms attached to the accounts payable were re-negotiated.

#### 7 VAT

Net VAT payables	<u>19 236 926</u>	<u>6 232 587</u>
------------------	-------------------	------------------

VAT is payable on the payments basis. Only once payment is received from debtors and payments made to suppliers, is VAT paid over to SARS.

#### 8 UNSPENT CONDITIONAL GRANTS AND RECEIPTS

<i>Conditional Grants from other spheres of Government</i>	<u>15 909 094</u>	<u>21 677 942</u>
Finance Management Support	0	17 380

12 252 289**Total**0**Consumer Debtors Pledged as Security**

No portion of accounts receivable was pledged as security for any financial liabilities

**Credit Quality of Consumer Debtors**

The credit quality of Consumer Debtors that are neither past nor due impaired can be assessed by reference to historical information about counter party default rates. Although credit quality can be assessed the Municipality did not apply any methods to evaluate the credit quality

**Consumers Debtors**

No security is held for any of the accounts receivable

### Consumer Debtors Impaired

As at 30 June 2011, Consumer Debtors of R 80 320 553 (2010: R58 083 827) were impaired and provided for

Amounts totalling R 1 980 82 (2010 R4 304 085) were written off as uncollectable against the debt impairment allowance account

These amounts best represent the maximum exposure to credit risk at the end of the reporting period without taking account if any collateral held or other credit enhancements

No portion is past due or impaired

	July 2011 R000's	July 2010 R000's
Residential	3 393 917	3 515 258
Commercial	2 130 355	2 046 875
State	603 394	559 694
Municipal	286 861	221 591
Agriculture	4 801 837	4 577 226
Other	247 309	857 606
<b>Total Property valuations</b>	<b>11 463 673</b>	<b>11 778 250</b>

Valuations on land and buildings are performed every four years. The last valuation came into effect on 1 July 2008. Interim valuations are processed on a monthly basis to take into account changes in individual property values due to alterations and subdivisions. The same rate is applied on different categories of property and improvement valuations to determine assessment rates. Rebates are granted on various categories of properties. Interest at prime rate plus 1% is levied on outstanding rates and the prime rate of ABSA applies.

### 39 NON-COMPLIANCE WITH CHAPTER 11 OF THE MUNICIPAL FINANCE MANAGEMENT ACT

#### Deviation from Supply Chain Management Regulation

Paragraph 12 (1)(d)(i) of Government Gazette No. 27636 issued on 30 May 2005 states that a Supply Chain Management Policy must provide for the procurement of goods and services by way of a competitive bidding process.

Paragraph 36 of the same Gazette states that the Accounting Officer may dispense with the official procurement process in certain circumstances, provided that he records the reasons for any deviations and reports them to the next meeting of the Council and includes a note to the Annual Financial Statements.

Please refer to Schedule 1 for a detailed schedule of the deviations from the Supply Chain Regulations.

### 40 CAPITAL COMMITMENTS

	2011 R	2010 R
Commitments in respect of capital expenditure:		
- Approved and contracted for	39 500 000	0
Infrastructure	39 500 000	
Community		
Heritage

#### 41 RETIREMENT BENEFIT INFORMATION

##### Joint Municipal Pension Fund

The last valuations of the Joint Municipal Pension Fund was done on 30 September 2009.

The results of the valuation (with provision for some future pension increases) are as follows

Actuarial Valuation	2009 R'000	2008 R'000
Actuarial value of Assets	1 956 314	1 942 228
Total accrued liabilities	1 845 529	1 794 944
Solvency reserve	110 785	147 284
Surplus / (Deficit)	<u>0</u>	<u>0</u>

Funding level (including solvency) 100.0%

##### Municipal Employees Gratuity Fund

The last valuation of the Municipal Employees Gratuity Fund was done on 30 June 2010

Actuarial Valuation	2010 R'000	2009 R'000
Share account	9 544 376	8 074 049
Reserve Account	229 798	174 719
Value of Fund 30 June 2007	<u>9 774 174</u>	<u>8 248 768</u>

The fund is financial sound for the requirements of the Pension Fund Act.

##### Municipal Employees Pension Fund

The last valuation of the MEPF was done on 29 February 2008

Actuarial Valuation	29/02/2008 R'000	28/02/2005 R'000
Assets	5 715 557	3 046 791
Liabilities	4 900 548	2 654 108
Contingency Reserves	382 289	196 571
Surplus/(Deficit)	<u>432 720</u>	<u>196 112</u>

This represents a funding level of 108.2%

##### Imatu Retirement Fund

The above mentioned fund is a defined contribution fund and according to regulation 2 of the Pension Fund of 1956 exempt from the provisions of sections 9A and 16 of the Act

#### 42 CONTINGENT LIABILITY

	2011 R	2010 R
Paper guarantees housing loan (ABSA)	<u>1 000 000</u>	<u>1 000 000</u>

A paper guaranty of R1 million has been negotiated with ABSA on behalf of officials in respect of housing loans. No collateral is needed by ABSA on housing loans.

The municipality is being sued by a member of the public for R708 446 78 for unlawful arrest, detained, assaulted and publicly degraded by a Traffic Officer.

<b>708 446</b>	<b>708 446</b>
----------------	----------------

The Municipality is being sued by 2 members of the public for R100 000 each for unlawful prosecution by our traffic department.

<b>200 000</b>	<b>200 000</b>
----------------	----------------

The municipality is being sued by Daily Double cc and others for civil liability viz loss of earnings, profit and general financial loss.

<b>23 000 000</b>	<b>0</b>
-------------------	----------

#### 43 RELATED PARTIES

Refer to Schedule 2 attached for detailed information.

##### Key management personnel information

All Councillors have disclosed their interest in related parties and no one has the ability to control or exercise significant influence over Council in making financial and operational decisions.

During the 2010/2011 financial year no Councillor or Official had any interest in related parties and no one could control or influence Council in making financial or operational decisions.

No remuneration was paid to family or key personnel.

There are no share based payments.

There are no post-employment benefit for key personnel.

#### 44 FINANCIAL INSTRUMENTS

The main risks of the Municipality are interest rate risk, liquidity risk, credit risk and the fair value of financial instruments.

##### Interest rate risk

The Municipality is exposed to interest rate risk on its investments and long term borrowings.

This risk is managed by investing in investments with different maturity dates. This enables the Municipality to re-allocate some of the investments in the event of major fluctuations in the interest rates. Borrowings issued at variable rates expose the group to cash flow interest rate risk. Borrowings at fixed rates expose the municipality to fair value interest rate risk.

##### Currency risk

The Municipality does not have currency risk as in terms of section 163 of the Municipal Finance Management Act, No 56 of 2003, no municipality may incur a liability or risk payable in a foreign currency.

##### Liquidity risk

The Municipality's risk to liquidity is a result of the funds available to cover future commitments. The Municipality's policy on counterpart credit exposures ensures that only counterparties of a high credit standing are used for the investments of any excess cash.

### Credit risk

Credit risk consists mainly of cash deposits, cash equivalents and trade debtors. The municipality only deposits cash with major banks with high quality credit standing and limited exposure to any one counterparty.

The utilisation of credit limits is regularly monitored.

Financial assets exposed to credit risk at year-end were as follows

Long term liabilities - ABSA	-11 600 000	-11 600 000
Long term liabilities - INCA	-19 829 408	-21 357 971
Long term liabilities - DBSA	34 780 000	91 617
Local registered stock - DBSA	-15 000 000	-15 000 000
Finance lease liability	-5 210 413	-4 469 350
Investments - BOE	17 905 531	16 118 386
Investments - Liberty	2 777 098	1 809 149
Non-current receivables	2 900 263	2 456 610
Trade and other receivables	46 593 962	38 634 477
Other receivables	81 532 188	70 439 627
Cash and cash equivalents	22 198 274	-4 159 424
Trade and other payables	-79 307 759	-90 251 762
Consumer deposits	11 574 824	6 658 556
VAT payable	-19 236 926	-6 232 587
Unspent conditional grants and receipts	-15 909 094	-21 677 942
	<u>54 168 540</u>	<u>-38 540 614</u>

These balances represent the maximum exposure to credit risk.

### Counterparties

The Municipality only deposits cash with major banks with high quality credit standing and limits exposure to any one counterparty. The Municipality has no significant concentration of credit risk with any single counterparty or a group of counterparties.

## 45 COMPARISON WITH THE BUDGET

The comparison of the Municipality's actual financial performance with that budgeted is set out in Annexure E(1) and E(2).
